Summary

Computer Science graduate with a passion for AI and intelligent systems. Built multiple academic and self-initiated projects including an AI Call Agent and Resume Parser. Strong foundation in Python, web technologies, and cloud deployment. Actively learning advanced tools like LLMs and LangChain. Open to opportunities where I can learn, contribute, and grow in real-world environments.

Skills

Programming Languages

Python, C++, SQL

AI & NLP

HuggingFace, Groq, OpenAI, spaCy, Deepgram

ML & Data

Scikit-learn, NumPy, Pandas, TensorFlow

Web & Backend Development

HTML, CSS, JavaScript, Django & Flask

Microsoft Office 365

Word, Excel, PowerPoint, Outlook, Teams, OneDrive, SharePoint & Admin Features

Cloud

AWS Cloud Architecting, DigitalOcean, Firebase Hosting

Mobile App Development

Flutter (Dart), Java (Android)

Dev Tools

Git, GitHub, REST APIs, Postman

Projects

Smart AI-Powered CRM (Final Year Project)

Python • Twilio • PostgreSQL • DigitalOcean • FastAPI

- Developed a smart voice agent that takes food orders via phone using AI & STT
- Handles Urdu/English input, stores data in DB, and sends SMS confirmations
- Deployed on DigitalOcean with secure backend logic

FairHireQuest – AI Job Portal

MERN Stack | AI | Resume Parsing | Anonymous Screening | Recruiter Chat

Developed a smart job portal designed to ensure fair hiring practices. Key features include:

- **Anonymous resume screening:** hides personal identifiers to reduce bias
- **Real-time recruiter-candidate chat**
- **Resume parser engine:** built with Python and spaCy for skill and experience extraction
- **Job-matching system:** matches resumes with relevant jobs using NLP
- **Admin & employer dashboards** for tracking applicants and interviews
- Stack: React, Node.js, MongoDB, Express, Python (backend for AI), Cloudinary (for resumes)

Spam Email Finder

Riphah International University

Developed an AI-powered spam detection system using Python, Scikit-learn, and NLP techniques. Utilized machine learning algorithms for email classification and filtering

Education

2021 – 2025

Lahore, Pakistan

Bachelor of Science in Computer Science (BSCS)

Riphah International University

Awards

2023/06	Best IOT Project <i>Riphah International University</i>
2024/04	Best Startup Idea <i>ITCN ASIA</i>

Certificates

Machine Learning

- Completed an online non-credit course authorized by **Politecnico di Milano** through Coursera

IT and Business Essentials

- Developed practical expertise in modern IT tools, including cloud platforms like Azure, AWS, and GCP, along with Microsoft Office 365. Gained foundational knowledge in server installation, network management (LAN, WAN, DNS, DHCP), and endpoint security.

Developing a Google SRE Culture

- Learned advanced Site Reliability Engineering (SRE) practices, including service reliability, observability, and incident management.

Networking Essentials

- Covered fundamental networking concepts, including network protocols, IP addressing, routing, switching, and security. Developed practical skills in configuring and troubleshooting network infrastructures.

AWS Academy Cloud Architecting

- Completed 60 hours of intensive training on cloud computing, infrastructure design, and cost optimization strategies on AWS.

AWS Academy Cloud Foundations

- AWS Architecture, AWS Cloud Fundamentals, AWS Core Services, AWS Pricing and Cost Optimization, AWS Support Plans, Cloud Security and Compliance, Cloud Deployment and Management

Soft Skills

Problem-Solving

Strong analytical and critical thinking abilities

Team Collaboration

Effective team player with a proactive approach

Time Management

Adaptability

Internship

2024/09 – 2024/10 lahore, Pakistan	Mobile Application Development <i>Micro Star Tech</i> - Developed mobile applications with interactive features using Java and XML, focusing on usability and performance. - Collaborated with cross-functional teams to deliver user-centered app designs and improvements. - Enhanced application efficiency by optimizing code and incorporating scalable solutions.
